

**CTPG Technical Team Response to  
Great Basin Energy Comments on  
CTPG's draft Phase 3 Report**

**Comment:**

Request to adjust terminal connection end point for proposed Great Basin Energy project alternative.

**CTPG Response:**

CTPG appreciates the comments from Great Basin Energy in regards to their proposed project alternative. While CTPG endeavored to model the proposed alternatives as provided the lack of a specific end point for the Great Basin project presented challenges in the modeling. CTPG appreciates Great Basin Energies willingness to provide the level of modeling detail required and regrets if any implication were given that CTPG made a suggestion for the project end point. As a result CTPG will re-analyze the Great Basin Energies' alternative with their choice of an end terminal as part of the Phase 3 Study.
