Subject: CTPG response to Comments from the BAMTG

Message: I just saw on the last page of the CTPG response to the BAMTG comments on the Phase 2 study report and the Phase 3 study plan that CTPG believes that the project to loop the coachella-Devers line into the mirage station and reconductor the whole thing to 494 MVA was approved by the CPUC. I could not find the approval on the CPUC website. Can you please tell me when and how CPUC issued the approval?
Thank you very much
Jacki
